

SUPLEMENTO DE LA REVISTA MEXICANA DE FÍSICA

VOLUME 1
ISSUE 2
JUNE–JULY
2020

CONTENIDO/CONTENTS

Flow around a Wingmill device for energy extraction, D. F. BALAM-TAMAYO, B. FIGUEROA-ESPINOZA AND C. MÁLAGA	1–7
On a general correlation for the discharge rate of grains through slots in thin sidewalls of silos due to gravity, G. M. BRITO-LICEA, A. LÓPEZ-VILLA, A. ZACARIAS-SANTIAGO, AND A. MEDINA	8–11
Characterization of an interstitial current model around a cancer nodule using optical tweezers, O. L. TORRES-SAUCEDO, B. MORALES-CRUZADO, AND F. G. PÉREZ-GUTIÉRREZ	12–17
Numerical simulation of a polymer melting process using solar energy, J. NÚNEZ, A. BELTRÁN, M. RIVERO, AND J. VEGA	18–24
Permeability simulation in an elastic deformable sandstone under stress changes, M. E. VADILLO-SÁENZ, P. F. AGUILAR-GASTELUM, M. A. DÍAZ-VIERA AND M. CORONADO	25–33
Proceso de descarga de un silo como una línea continua de ruido, J. R. HERNÁNDEZ-JUÁREZ*, A. LÓPEZ-VILLA, A. MEDINA, AND V. BARROSO	34–37
Liquid metal mhd steady flow and heat transfer in a rectangular duct with perfectly conducting walls perpendicular to the applied magnetic field, V. SOLANO-OLIVARES, S. CUEVAS, AND A. FIGUEROA	38–44
Experimental study of capillary penetration in rectangular Hele-Shaw cells closed by two edges, R. DIEZ BARROSO-AGRAZ, G. GÓMEZ-LÓPEZ, A. LÓPEZ-VILLA, AND D.A. SERRANO	45–50
